Only some unforeseen circumstance can halt the trend of Republicanism. The people, turned against the Wilson Administration and suspicious of the League of Nations, are almost tunanimous in their demand for a Republican President.

That is the situation as it exists to-night, four weeks before the election, and the statement is made after the name of the trend of Republican President.

Missouri a Storm Centre.

Missouri went Democratic in 1916
by 28,000, with those of German sympathy voting for Woodrow Wilson because "he kept us out of war." This yote almost entirely is lost to the Democratic party. To add further to the worry of the Democrats there is the disaffection of Senator James A. Reed, who is fighting the League of Nations. Reed will draw many votes from Cox.

On the other hand, with a few notable exceptions the Democratic press is dominant in Missouri, vigorous in fighting on the other hand, with a few notable exceptions the Democratic press is dominant in Missouri, vigorous in fighting the cause of Gov. Cox. Missouri in addition, is normally Democratic, so that the extension of votes to women naturally has increased the margin which the Republicans will have to overcome if they are to carry the State. Furthermore, each party has a complete and well functioning State organization and each is claiming the State by a margin in the neighborhood of 10,000. Missouri will be one of the storm centres in the windup of the campaign.

Colorado is just recovering from the recent primary elections which split both the Republicans and the Democrats. The State went Democratic four years ago by 75,000, a margin that is difficult for the Republicans to overcome. The Non-Partisan League has captured the Democratic State ticket, drawing support from both the Democrats and Republicans, from the Republicans in the farming districts and from the Democratic plants.

FORECAST G. O. P. First Day of Registration in City and Enrolment for 1921 Primary

THIS is the first day for registration in New York city for the coming election. Failure to register means forfeiting a vote. It is possible to vote by mail if the citizen is compelled to be away from home on election day, but he cannot vote by mail or any other way unless he registers this week. And he cannot register in any other

way than in person in his own district. The polls will be open from 5 o'clock in the evening until 10:30 every day excepting Saturday, when they will be open from 7 o'clock in the morning to 10:30 in the evening.

Registration also furnishes the only way open for voters to enroll in political parties in order to participate in the primary election next year, when nominees for Mayor and other city offices will be chosen. Any one who neglects to register this week in effect disfranchises himself for a year.

The political organizations and all the auxiliary associations are prepared to make a big drive throughout the city every day this week to get out the vote. Tammany and the Republican organization have made arrangements for checking up the registration day by day so that appeal can be made to every voter.

Special effort is to be made to get women voters to register. Tens of thousands of women are indifferent to the ballot, which they may cast for the first time for a nominee for President, and it is feared will not register unless induced by personal appeal. All of the organizations are urging their followers to take wives and sisters to the enrolment booths.

The registration days in the State outside of this city are October 8 and 9 and October 15 and 16.

Situation in Nevada.

So far as Nevada is concerned. Democratic confidence admittedly is based on its normal Democratic margin, at times of less than fifty votes, although Wilson carried it by 5,000. The voting population is so widely scattered that it is impossible to forecast anything except in Reno, a wide open town, where Gov. Cox is favored as a liberal.

North Dakota, which the Democrate care unwilling to concede, is in a peculiar condition because of the live reached the conclusion that it is better to let their apples rot on the stronghold, is more Republican than throw their goods away to distributors who refuse to cut retail prices and consequently deliberately restrict the market.

Missouri is placed in the doubtful list because there are numerous uncertain elements to be considered. In Colorado there is a local situation which might castly turn the State one way or the other. In Nevada the population is too widely scattered over a large territory to permit an honest judgment as to how the State will go. In all events, the result in these three States, which normally are Democratic, will be close.
